

## ***QA Fundamentals Tutorial Update***

An updated version of Quality Assurance training material is made available for your use. This material is provided for DOE offices and contractors to use in providing basic training on the requirements of the DOE O 414.1C and 10 CFR 830. The package includes the presentation slides along with speaker notes. The objectives of the training is to provide individuals with a basic understanding of:

- Underlying principles of quality assurance
- DOE quality assurance requirements
- Interrelationship between QA, ISM, and PAAA
- Application of QA in their work environment

Users are encouraged to modify the material as needed to fit their specific needs. If you require assistance in recasting the training material or in conducting the training, please contact Frenda Lundmark in the Office of Quality Assurance Programs at [frenda.lundmark@eh.doe.gov](mailto:frenda.lundmark@eh.doe.gov).

DOE will update this material from time to time. Suggestions and recommendations may be sent to Bud Danielson in the Office of Quality Assurance Programs at [bud.danielson@eh.doe.gov](mailto:bud.danielson@eh.doe.gov)
